

CHERUBS

OUR ACHIEVEMENTS THUS FAR

Trail Blazing

Congressional Bills

CHERUBS has pushed for Congressional support for CDH Awareness and NIH funding since 2012, including legislation.

Global CDH Community

CHERUBS has served families in 63 countries, is a founder of ACDHO and leads the international push for CDH research and awareness

CDH Awareness

Landmarks have lit up around the world including the CN Tower, Superdome and Niagara Falls.

Real Help for Families

Over 6100 CDH families have been served through many projects, grants, conferences and more.

CDH Research and Funding

CHERUBS created the first patient driven CDH research database and has presented 4 studies, funds grants and works closely with researchers.

Noteworthy

CHERUBS is the world's oldest and largest CDH charity, founded by 2 moms on a kitchen table with just a typewriter in 1995. The organization was the first to use a model of "support, awareness and research", which has been imitated by 100's of others non-profits for various causes.

In 1997, CHERUBS was one of the first non-profits on-line and has grown to be the worldwide leader for CDH raising awareness through media, social media and an international level.

With an annual budget of just \$200,000 with a staff of 2 employees and less than 50 volunteers, our organization has an overhead of just 8% and self-audits annually.

CHERUBS helps fight Congenital Diaphragmatic Hernia by providing information, matching families, financial grants, scholarships, care packages, local events, international conferences, the CDH Research Survey and much more at no costs to families.
